

DFP NEWS

Your source for important information and specials in the Touch-Up Industry!

Volume One Issue 7 March/April 2005 Published by DFP Inc. ©2005

One of the easiest ways to preform a quick and inexpensive repair on wood based products is to use a Fill Stick.

Our line of Production Fill Sticks and their unique "easy-fill" formulation allows you to fill in holes, dents, gouges or open joint sections with ease. More importantly, our Production Fill Sticks can be top-coated with lacquers, varnishes and enamels along with other synthetic and catalyzed topcoats.

The Production Fill Sticks are blended from high grade wax that won't shrink, and applies simply by rubbing in. No

heat or special tools are necessary. Just rub it in and wipe of the excess, top coat if needed and you're done. As easy as 1-2-3.

For more information on North America's lowest cost Production Fill Sticks or our line of Classic Fill Sticks, please see page 3 of our catalogue.

TIP OF THE MONTH:
 Ever need to make a piece of furniture look great with the wipe of a cloth? Try **TRADE SECRET SCRATCH REMOVER**, available for LIGHT AND DARK wood. It covers nicks and scratches making furniture look great & adding value!
 See pages 19 & 22 in our catalogue.
